Hello Madeira Beach,

Happy New Year to all in the City, our permanent and seasonal residents and any visitors we have during these cold winter months (that occur everywhere else but here!). It is wonderful to start a new in this ever progressing (and warm) community.

As I reflect over the last year and look to the new one, I am reminded of a quote I once happened upon:

"What is not started today is never finished tomorrow."
~Johann Wolfgang von Goethe

The City of Madeira Beach continues to move forward in its strive for excellence. We continue to work together to achieve the goals that we have set. You can see the beginning steps all around you – the orange cones on Gulf Boulevard, on the county digital board, and even mentioned during our meetings. The undergrounding effort is underway on Gulf Boulevard, as well as the landscaping and beautification. We are also looking into ways to improve our crosswalks and enhance pedestrian safety and a major stormwater project will shortly begin in the Boca Ciega neighborhood. While these projects may at time seem inconvenient when you're trying to travel to and fro, I think about the quote above – we have already started today, which means we are just one step closer to our ultimate goals. Many times the hardest step is the first, but now we are underway and gaining momentum!

Here at Madeira Beach, we also have a lot of fun in store these next few months. The February 19th -21st weekend, we will once again host the EMU Softball Tournament for NCAA Women's Softball. This is the second year in a row that this invitational has worked with the City and we are excited for their return. Our famous fishing also returns as the 23rd Annual Spring King of the Beach Fishing Tournament will take place on April 28th – 30th. This three day event will include music, marine crafts and vendors, and many raffles and auctions. There is a lot happening at Madeira Beach and we will continue to work with all of our residents and communities to help achieve our goals. As you reflect on this New Year and ponder the new opportunities and goals you can make, take a moment and reflect on what a wonderful notion it is that we live in this beautiful City.

Thank you and God Bless,
Travis Palladeno

Gulf Beach Masonic Lodge, located at 14020 Marguerite Dr in Madeira Beach, sponsored a Masonic Cornerstone Laying which was performed by the Most Worshipful Grand Lodge of Free & Accepted Masons of Florida at the New City Hall complex on Madeira Beach.

From the desk of the City Manager

Shane B. Crawford • City Manager
727-391-9951 ext. 228
scrawford@madeirabeachfl.gov

Happy Spring to our residents and our seasonal guests!

As I enter my fifth year as your City Manager, I can tell you the last six months have been the most tenuous and yet exciting months I've ever experienced in my twenty-year career as a government official. For our year-round residents, I don't have to tell you what I'm talking about; but for our returning residents and visitors, my entire article is going to center on redevelopment and new development and how it occurs and is managed within the City of Madeira Beach.

When I was recruited in 2012, the redevelopment of what is affectionately called "the old Leverocks property" was part of what was being asked of the new City Manager to get developed along with finalizing a deal to get a new Marriott Hotel built in Madeira Beach. The City passed a number of ordinances to encourage developers to consider redeveloping or creating new development.

In 2012, Ordinance 1179, which amended the City's Comprehensive Plan to enable the use of Development Agreements as provided for in State Statutes, was enacted. Also, Ordinance 1181 was enacted as well which amended the City's Land Development Regulations to establish the process and guidelines for utilizing development agreements. Subsequently, Ordinance 2012-05 was passed which approved the zoning map amendment and site plan for a new 90-unit Marriott Courtyard Hotel utilizing Planned Development and Development Agreement provisions of the plan and code.

In 2014, the Board of Commissioners passed a series of ordinances that were "redevelopment-friendly". Ordinance 2014-05 was passed amending the City's Comprehensive Plan to provide for a series of redevelopment-friendly initiatives including:

BE the MESSAGE
Share the MESSAGE
OF GRACE
and TRUTH

- Creating a new “Resort Facilities High” plan category that allows the City to consider increased Temporary Lodging density/intensity where warranted
- Revising the Planned Redevelopment-Mixed Use plan category that applies to the Town Center Special Area Plan to incent Temporary Lodging and Mixed Use
- Enabling the use of density/intensity averaging techniques in the course of redevelopment

Ordinance 2014-06 was passed amending the City’s Land Development Regulations to establish the Procedures and Standards by which to apply the Density/Intensity Averaging Provisions, and clarified and expanded the Planned Development District Process to provide for its use with the new Resort Facilities High Plan Category. Finally, Ordinance 2014-07 was passed amending the City’s Town Center Special Area Plan to Provide Increased Flexibility Regarding Density/Intensity Standards by Correlating the Standards with the new Resort Facilities High Plan Category and Planned Development Zoning District, and updated the accompanying infrastructure analysis to correspond with the plan changes. These amendments to the Town Center Plan included in Ordinance 2014-07 were approved pursuant to the Pinellas Countywide Plan Rules.

So you may be saying, “That’s all fine and dandy Shane, but what the heck does that mean?” I think it’s safe to say that the City Planning Commission and the Board of Commissioners were ready to embrace some “facelifts” within Madeira Beach

However, and I’ll be the first to admit it, was the City ready to become an epicenter and focal point for development? Did we think that we’d be in the position where we are today with a major development including a major hotel, restaurant, condo facilities and marina would be going in at the “old Leverocks property” replacing an old abandoned restaurant and fish processing plant? Was the City ready to consider a major redevelopment on the north side of 150th Avenue and along Madeira Way when Mr. Barry Loft’s properties were to be sold? And when the new Publix was being built, did we ever consider the “what if’s” that would be associated if Winn Dixie Corporate decided to redevelop their parcel as well? The answer is of course it was considered. However, the reality is that the decision making time is upon us and these projects will in all probability be acted upon in this calendar year.

The ordinances that were passed by this Board of Commissioners are effective tools for what they were intended. However, these tools come with great power and with great power comes great responsibility. The Planning Commission and the Board of Commissioners will now be tasked with balancing increased tax base, refurbished eye sores, and bigger tourism numbers with possible traffic congestion, infrastructure concerns and the like.

This is not an easy time to be a Planning Commission member or City Commissioner. However, I implore the community, rather than look at the downsides, be encouraged that our City is getting recognized as a place that people want to be and that some of our lesser desirable properties now have the chance to be molded into something that makes Madeira Beach great. I can promise you that the Planning Commission and City Commission take this issue quite seriously.

These developments are somewhat massive in size compared to what we have seen previously. You can rest assured that your elected and appointed officials will not approve something that will harm the way of life for our citizens or frankly approve something that doesn’t fit what Madeira Beach is all about.

This is a time to come together as a community, voice concerns, and get these developments molded in a way that our year-long residents, our part-time residents, and our tourists can all enjoy the greatest City in Florida. If you have any questions or concerns about development or other city issues, please do not hesitate to contact my office.

Thank you and we’ll talk to you again in our Summer Edition of “The Wave”.

Madeira Beach Fire Department Increases Water Rescue Capabilities

Surrounded by water, Madeira Beach is no stranger to water emergencies. For years, Madeira Beach Fire Department has been utilizing surfboards for quick, efficient, low maintenance water rescue operations. Often times the conditions were too rough or the victims are too far from shore. To increase the public's safety and improve our response capabilities, MBFD has placed in service two Personal Water Crafts.

The PWCs are equipped with rescue boards which were designed in Hawaii for high surf operations. The vessels allow for marine rescue operations up to five miles off-shore and have the capability to manage multiple victims.

In 2015, there were 46 marine rescue incidents in our Community. With warm weather approaching we hope our residents and visitors will enjoy our Tampa Bay waterways safely.

Congratulations D/E Ryan Robert's for being selected by your peers as the 2016 Firefighter of the Year. Your dedication and commitment to our Community is greatly appreciated!

The pending purchase of a new ladder fire truck for the Madeira Beach Fire Department will significantly increase the safety of residents by aiding in fire suppression and rescues.

Crabby's Fishing Corner

Inshore: Winter is here and most anglers will use this time to maintain their equipment or head to the woods for some hunting opportunities. However, warmer days and abnormally low tides can result in some dynamite fishing opportunities for those willing to put on some waders and fish the deep holes in a flat. Negative low winter tides will leave a vast majority of shallow flats exposed with only deeper holes and channels holding trout and redfish in surprising numbers. There are numerous fishy areas such as this around Tierra Verde and Fort Desoto with easy wading or kayak access.

I prefer to wade these areas because it gives me more control, vision and stealth. Typically I bring one 3000 series spinning reel on a seven foot medium action rod loaded up with 10 pound braid and a twenty pound shock leader. My lure of choice is a 1/8 ounce jig head and a root beer or new penny colored paddle tail plastic body. Z Man's Scented PaddlerZ and MirrOlure's Marsh Minnow work very well. The key to targeting these fish are long casts focusing around the edges of the hole or channel then slowly working the lure into the deeper water. A slow retrieve is imperative to getting cold lethargic reds and trout to strike. Just lift the rod tip up slowly about three feet or so then let it fall and rest on the bottom for a second or two and repeat.

Cut pinfish and finger mullet work very well but are a little messy and tough to use while wading. If fishing is tough on the low tide, stick it out and wait on the first hour or so of the incoming. Redfish will start to tail and push large wakes in the shallow warmer water in their search for food. It will take an accurate cast to get the lure in the strike zone without spooking the fish, but the churning water and screaming drag will make it all worth the effort.

Offshore: Weather will be the biggest obstacle the next few months. With short weather windows and cold mornings, being ready and willing to go at the drop of a hat will provide some stellar bottom fishing opportunities. This means having your gear ready along with some frozen squid and sardines in the freezer. Red grouper, grunts and sea bass will be your main targets over hard bottom in depths of 35 to 60 feet. Start off by fishing with quarter size chunks of squid to get the bite going and the larger fish interested in what's going on. After you have caught a few smaller fish drop down a whole squid or sardine and be ready to pull that grouper away from the structure. Red grouper must be a minimum of 20 inches and the daily bag limit is two per person.

If you have any boating or fishing questions give us a call at the Marina (727) 399-2631.

Good luck and enjoy fishing this New Year.

~Brian Crabtree

The Old Salt Fishing Foundation named Capt. Dave Zalewski a LIFETIME MEMBER which is a prestigious award that very few receive.

Next, The KIDS win big at the recent Johnny Kellar Fishing Inshore Tournament.

Do you want your yard to be a Florida Yard?

It is not about turfgrass anymore! Less grass is better. Be the cool homeowner by installing native plants in your yard. Every homeowner can Floridify their yard and reduce pollution runoff by following a few key guidelines.

1. Use Turfgrass Only Where Needed for Pets or Play Areas

- Use Florida friendly trees, shrubs and groundcovers to reduce turfgrass in your yard.
- Match the right plants to the right places in your yard.
- Expand your landscape beds and reduce the time spent mowing your yard.

2. Use Water Wisely

- Don't water until you can see footprints in your lawn and the leaves of your plants are starting to curl.
- Don't water when rain is expected or immediately after it rains.
- Place an inexpensive rain gauge in an open area so you can track the amount of rain falling on your yard and the amount of water used for irrigation.
- Supervise your sprinklers to make sure that the heads aren't broken and that the water is spraying on your lawn and not the street.
- When you irrigate, it is better to give the landscape at least 1/2 to 3/4 inches of water so that turfgrass and plants put down deep roots.

3. Reduce or Eliminate Fertilizers

- Remember that there is a ban on use of fertilizer for turfgrass in ALL areas of Pinellas County between June 1 and September 30.
- When you fertilize your lawn, use a fertilizer with slow-release nitrogen and no phosphorous.
- Clean up fertilizer that lands on sidewalks, driveways or roadways. Blow it back on to your yard.
- Remember to keep fertilizer at least 10 feet away from surface water and the edge of a seawall.

4. Reduce or Eliminate Pesticides

- The No. 1 rule for pest control is to know what insects are infiltrating your territory before you start applying pesticides.
- Many insects in Florida are helpful, such as ladybugs and spiders.
- There are a variety of non-toxic horticultural soaps and sprays that keep harmful plant insects under control without using poison.

Check out the following web site for more information, including Florida Friendly Products and Landscape Services:
<http://befloridian.org/floridifying/>

City staff thanks every resident for their support in reducing pollution to the Bay.

49th Annual 'Festival of Lights' Boat Parade

This year was a great year for the 49th Annual Festival of Lights Boat Parade with over \$7,000 in prize money up for grabs! We had a great turn out with 25 boats entered. The weather was awesome - nice cool air to get us in the mood for the holiday season. A big THANK YOU goes out to everyone that participated in this years event. The new big thing this year was the Rockin' The Boat Festival down at the newly renovated recreation field and ROC park. ROC park held some of the best viewing areas of the night. The parade finishes here and they lit up the sky with some awesome fireworks.

Congratulations to all the winners and a huge THANK YOU goes to the Marina Staff, Dan Casey at Snappers for a beautifully catered awards ceremony and of course Dave Marsicano for heading up the whole event.

The BIG overall winner this year, taking home a check for \$2,500 was Santa Fishing by Tom Schaffer
